Detailed Action

The amendment filed on 6-3-2005 has been entered.

Claims Rejection - 35 U.S.C. 102(e)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 2, 3, 5, 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Marshall et al. (U.S. Patent No. 6,453,559).

The utility knife tool (see Fig.8) of Marshall et al. shows all the claimed structure. The operational/functional language as in claims 11 and 12 (i.e. such that) does not define any structure and accordingly cannot serve to distinguish.

Claim Rejection - 35 U.S.C. 103(a)

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Marshall et al. (U.S. Patent No. 6,453,559).

Marshall et al. show a utility knife tool (Fig.8) substantially as claimed except the movement of the blade cover (39) is not parallel to the movement of the trigger (72).

Official notice is taken of the fact that it is notoriously old and well known in the art to have a movable element that is moved by a trigger such that the movement of the movable element is parallel to the movement of the trigger. One example is shown in Andrews (U.S. Patent No. 2,710,448).

Therefore, to have the blade cover (39) of Marshall et al. moveable in a direction parallel to the movement of the trigger (72) is deemed to be an obvious matter of personal preference than any inventive concept.

Remarks

Applicant's arguments with respect to claims 1-5 have been considered but are moot in view of the new ground(s) of rejection.

Action Made Final

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
